About Us

TW Hicks is your resource for high-quality, cutting edge industrial flooring solutions.

We combine an innovative, knowledgeable, and intensely committed team of industrial flooring professionals with top products and services to give you a quality solution. We are a woman-owned and family-operated company, founded on over 30 years of experience in the industry, and 20 years in business.

We have offices conveniently located in Dallas/Fort Worth, San Antonio, and Houston to service all of Texas, Louisiana, and Oklahoma.

Polished Concrete

The TW Hicks dyed and polished concrete floor protection system transforms standard concrete flooring to a customizable and unique flooring. Concrete can be colored, while being placed through integral color or the use of dry shake color hardeners, and then polished. Dry shake colors give a decorative look to industrial polished concrete flooring. Existing concrete can be colored by concrete dyes or concrete acid staining and polished. Additionally, concrete can be polished uncolored to create superior, wear-resistant polished concrete flooring. Polished concrete will change weak, unsightly stained concrete into a strong and beautiful surface that is both easy to clean and maintain over time.

Where To Use

- Distribution facilities
- Warehouse facilities
- Storage facilities
- Commercial facilities

Advantages

- Increased abrasion resistance and impact strength
- Lowest 10-year life cycle cost
- Virtually maintenance free
- No adverse reaction to ultraviolet light or water spray
- Eliminates moisture vapor failures related to floor coverings
- Reduces silica dust and aids compliance in OSHA regulations
